SUMMARY

AI/ML Engineer and Founder building production-oriented AI systems across Generative AI, NLP, RAG, and intelligent automation. Founder of Hirevo, an AI-powered hiring platform for resume screening and candidate-job fit, and architect of AKademyOS, a deployed multi-LLM education platform. Designs and ships full-stack AI applications end-to-end with Python, FastAPI, Next.js, PostgreSQL/Supabase, Redis, and hybrid retrieval pipelines. B.Tech in Computer Science Engineering (AI & ML) at VIT Bhopal.

TECHNICAL SKILLS

Languages: Python, TypeScript, C++, SQL

AI/ML: LLMs, Generative AI, RAG (Hybrid BM25 + Dense, Reranking), NLP, Embeddings, Semantic Search, Prompt Engineering, Function Calling

Frameworks & Libraries: PyTorch, Scikit-learn, XGBoost, Pandas, LangChain, Sentence Transformers, Hugging Face

Backend: FastAPI (Async), REST APIs, Pydantic, Redis

Frontend: Next.js, React

Databases: PostgreSQL, Supabase, ChromaDB (Vector DB)

Cloud & DevOps: Docker, Vercel, Render, Git, Groq, Vertex AI

EXPERIENCE

Founder

Sep 2026 – Present

Hirevo (AI-powered hiring platform, India) | www.hirevo.in

- Building Hirevo, an AI-powered hiring platform that helps recruiters screen resumes, evaluate candidate-job fit, and make faster, better-informed hiring decisions from recruiter-ready candidate insights.
- Architecting the end-to-end AI pipeline: resume parsing → NER → taxonomy matching → semantic scoring via Sentence Transformer embeddings and vector search; batch processing 100+ resumes with automated ranking and AI-generated interview questions.
- Owning product and engineering from the ground up — Next.js/TypeScript frontend, FastAPI backend, Supabase (PostgreSQL) persistence and authentication, an LLM-powered recruiter Copilot for candidate comparison and analytics, deployment, and go-to-market.

AI Strategist

2026 – Present

AKademy38 (Australia-based EdTech, Remote)

- Architected and deployed AKademyOS, a full-stack education platform (Next.js + FastAPI) with authentication, role-based access, real-time group chat, and multi-LLM AI integration — live on Vercel and Render serving 35+ active users.
- Engineered a Booklet Generation Engine producing 50+ production booklets with PDF/HTML rendering, curriculum-aligned validation, and QA pipelines; cut token cost per booklet ~10x via prompt templating, staged generation, and shared-context reuse.
- Built ASK AK, a production LLM doubt-solving engine with rate limiting and context-aware responses for real-time student queries, on a backend of PostgreSQL data modeling, Redis caching, and Supabase persistence.

AI/ML Engineer (Intern)

May 2026 – Jun 2026

Pinnacle Labs (Kolkata, Remote)

- Built and shipped the Resume Intelligence Platform end-to-end as sole engineer — ATS scoring, skill-gap detection, keyword matching, and semantic candidate ranking against job descriptions — delivered as a publicly deployed application.
- Engineered hybrid retrieval with Sentence Transformer embeddings and BM25 for context-aware resume-job matching; built analytics dashboards and report generation (Python, FastAPI, Streamlit, Scikit-learn), owning the stack from ingestion to deployment.

PROJECTS

Explainable RAG QA System | Python, FastAPI, LangChain, ChromaDB, BM25, Groq

GitHub

- Built a hybrid retrieval pipeline fusing BM25 sparse and dense vector search ($\alpha=0.65$) for hallucination-resistant QA; achieved MRR 0.84 and ~45 ms latency with semantic chunking, reranking, and incremental indexing.

Heart Disease Prediction System | Python, Scikit-learn, XGBoost, FastAPI, Docker

GitHub

- Designed a stacking ensemble reaching 0.94 ROC-AUC; analysis identified calibration and dataset-size limitations of single-metric clinical evaluation. Containerized with Docker for real-time inference via FastAPI.

EDUCATION

Vellore Institute of Technology, Bhopal

Sep 2024 – Oct 2028

B.Tech in Computer Science Engineering (AI & ML) | CGPA: 8.4

CERTIFICATIONS & ACHIEVEMENTS

- DataForge Hackathon Finalist — IIT Roorkee E-Summit 2026
- GirlScript Summer of Code (GSSoC '26) — Open Source Contributor, Jun–Aug 2026
- Cloud Computing — NPTEL (Course Topper, Score: 86%)
- Applied Machine Learning in Python — University of Michigan (Coursera)
- Google Cloud — Gemini & Imagen AI Applications; Gemini Multimodality & Multimodal RAG
